It seems that things are on track. Steve responded to Doug. If you need me for a faster answer, give me a call. Unless I'm leading a meeting, I will step out and answer.

Hello Fonda:

Jeannine and Jennifer's responses were as if they were reviewing your email. In those responses, if you look at the list of email addresses, Kim was copied using two different email addresses. I don't feel left out or that we need more coordination. You have kept me informed.

Enjoy!

Jesse

Oops. Sorry. I just didn't see that Kim was on that string. My apologies.

Jesse.

I'm confused with your response and who you are directing it towards. Do you feel left out from the conversation or do you feel more coordination between our agencies are need when responding to CAG members?

Thanks, Fonda

In the previous two responses, you copied Kim. If you want to add more comments do it as continuation of the conversation and not as if we are proofreading Fonda's response.

Thanks,

Jesse

Looks good to me.

Kim.

CDPHE is more than willing to support the CAG in terms of helping you acquire documents and information you can't find, being a point of reference for the history of the area, explain how we interpret data and where it comes/came from, and many other types of information to help communities. However, because none of the agencies provide operational support to your CAG, we cannot maintain a CDPHE sponsored web based platform to post CAG business items such as minutes, independent findings/reports/videos.

As you know, EPA is the lead agency at the VB/I-70 Superfund site and works together with CDPHE and Denver in following the Superfund process. This CAG was supported (financially and administratively) and initiated by Denver for the surrounding communities of VB/I-70 OU2, to inform the communities of the infrastructure project which impacts OU2. Now that the portion of the infrastructure project in OU2 has been completed, EPA and Denver felt that there was not enough information/data being created to maintain monthly meetings. The CAG may disagree, but that was EPA and Denver's decision. EPA did commit to hosting quarterly meetings for the CAG and other stakeholders, which I know they are trying to coordinate with you for 2019. The state and EPA are still available to be points of reference in helping the CAG with questions you may have pertaining to the Superfund Operable Units of VB/I-70, and the process.
